

The 2018 Advanced Nuclear Summit

The Clean Energy Program

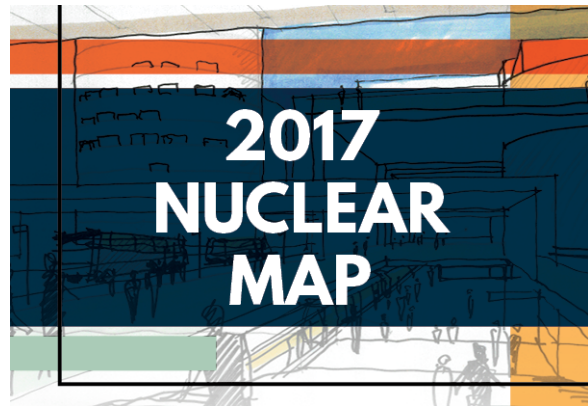

As the advanced nuclear sector gets closer to licensing and constructing new power plants, the theme of the third annual Advanced Nuclear Summit focused on building the broader community that is critical to support innovative nuclear technologies.

Welcome to Third Way's Advanced Nuclear Summit

At this year's summit, we dug into the exciting opportunities as well as the challenging issues faced by the emerging advanced nuclear sector. We featured four intimate panel conversations covering the following topics:

- How could local communities prepare to become early adopters of advanced nuclear technologies?
- What is the role of public and private investment in commercializing US advanced nuclear reactors?
- How can advanced nuclear be good for both national and global nuclear security?
- Is there alignment across low-carbon technologies to fight climate change?

Join the conversation on social media using [#NuclearReimagined](#) and by following [@ThirdWayTweet](#) and [@ThirdWayEnergy](#).
